COLD LIGHT LAMP WITH LEDS TECHNOLOGY
SHADOWS-LESS TYPE
6 white LEDs of 2,5W each. 24V
30.000 lux at 50 cm distance
Glass lens to optimize the light performances. Thanks
to many independents light sources it's possible
to assure shadows-less light and low radiated
energy temperature. ESALED is suitable for
examination purposes.

	RIMD400SO	LAMP D/400 CEILING	$ 9,995.00	999.50
	RIMD400PA	LAMP D/400 WALL	$ 9,450.00	945.00

The D400 series is a high technology apparatus designed to guarantee technical-illumination
performance, unique of its kind. The reduced dimensions and the lightness of the reflector
give the product stability and make it extremely easy to handle. The luminous beam is
always in focus, starting from a minimum distance of 60 cm. The diameter of the field
illuminated is regulated manually by rotating the handle, which can be sterilised, at the
centre of the reflector. The luminous intensity can be adjusted electronically.
	RIMTRISPI	TRISPI LAMP TRIS MOBILE STAND	$ 7,295.00	729.50
	RIMTRISPA	TRISPA LAMP TRIS WALL	$ 6,995.00	699.50
	RIMTRISSO	TRISSO LAMP TRIS CEILING	$ 8,495.00	849.50

This is a shadowless lamp with exceptional technical performance and excellent flexibility of
use, particularly indicated for small surgery, gynaecological and first aid surgeries. The cupola
is of reduced dimensions with three internal parabolas in optical glass with a parabolic arc
that allows suppressing the shadows and obtaining in-depth light. Extremely easy to handle
and stable in position. Focusing and adjusting the diameter of the illuminated area takes place
by rotating the handle, which can be sterilised, at the centre of the reflector. Adjustable friction
bearings are mounted on every articulation of the lamp

	RIMSATURNOS	SATURNOS LAMP SATURNO CEILING	$ 5,995.00	599.50
	RIMSATURNOP	SATURNOP LAMP SATURNO WALL	$ 4,995.00	499.50
	RIMSATURNORL	SATURNORL LAMP SATURNO MOBILE STAND	$ 5,295.00	529.50

This is a shadowless type lamp indicated for small surgery, gynaecological and first aid
surgeries. An aluminium reflector dissipates the filtered heat externally. A filter protects
the parabola assuring a colour temperature of 3.500K. The luminous intensity is 40.000
lux at a distance of a metre, while the diameter of the illuminated field is about 15 cm.
The parabolic arc allows suppressing the shadows and obtaining in-depth light. It does
not need to be focused. Extremely easy to handle and stable in position. Adjustable friction
bearings are mounted on every articulation of the lamp. The bulb is easy to change
even by non-specialised personnel.

PENTALED 30 is a highly technological apparatus designed
to guarantee excellent performances.
PENTALED 30 consists of 30 elliptic reflectors divided in
6 modules with 5 LEDs each.
Indirect light: 30 elliptic reflectors, result of a complex
mathematic calculus, reflect the rays of light of the LED
punctiformly, guaranteeing three-dimensional lighting and
elimination of the shades on the operating field.

The PENTALED 9 series is a high-tech apparatus designed
to guarantee excellent performance.
Its reduced dimensions and the lightness of the reflector
gives the product easy handling and stability. 9 elliptical
parabolas, result of complex mathematical calculations,
reflect the light beams of the Leds uniformly in dots to
obtain the total suppression of shadows from the operating
field.
